

Hello,

I am writing to inform you that I am unable to complete Task 4 due to an issue with my AWS account. The account has been suspended because Yalla Visa is no longer supported due to recent governance decisions (please click [here](#) ). I have tried my best to find an alternative account to complete the tasks, and I asked my friend to use his account. However, Task 4 requires a non-free service (Elastic Load Balancer), and my friend is unable to use his company account for this purpose.

I have successfully completed the first two tasks as they required services that are either free or available in free tiers.

Thank you for your understanding.
